

AWARD FEE FINDINGS AND DETERMINATION

This constitutes a determination of award fee earned by Teledyne Brown Engineering under Contract NAS8-02060 with the George C. Marshall Space Flight Center.

The Performance Evaluation Board, acting under the authority of MSFC Management Announcement, has completed its evaluation of the contractor's performance under Contract NAS8-02060 for the period August 1, 2004 through January 31, 2005.

The Board's assessment of the contractor's performance and its recommendation to the undersigned Fee Determination Official for the stated period is a numerical rating of 93.5 or an adjective rating of Excellent and an award fee percent of 93.5. This rating equates to a recommended award fee in the amount of \$282,833.

FINDINGS

Upon a review of the Board's considerations in arriving at its recommendations and the contractor's response to the Performance Evaluation Board Report, I hereby find the 93.5 percent Excellent rating as recommended to be a proper assessment of the contractor's performance for the stated period.

DETERMINATION

Of the total award fee available, \$302,496 was applicable to the current evaluation period.

Based upon the findings set forth above, I hereby determine that Teledyne Brown Engineering is awarded fee, pursuant to Contract NAS8-02060 in the amount of \$282,833 for the period ending January 31, 2005.

Charles B. Chitwood
Fee Determination Official

March 29, 2005

In September of 2004 Order 15 was revised. At the time of the RFP, proposal and modification it went unnoticed by the CO and the contractor that the project manager had revised the order to include award fee AND incentive fee when previously it was award fee only.

Mod 77 corrected Order 15. This correction changed the award fee and performance fee for period 5. The performance fee for Period 5 was awarded correctly. The award fee potential for award 5 was decreased by \$19,162 from the PEB amount reported of \$302,496. Thus, the modification awarded award fee for period 5 is \$283,334 potential x 93.5% award fee earned for a total of \$264,917 and not the \$282,833 reported on the D&F.
